The screenshot shows a Windows XP desktop with a taskbar at the bottom. The taskbar includes the Start button, a few open application windows (one titled 'PCMag.com'), and the system tray with the clock showing 11:58 AM on 11/11/2006. A 'Security Warning' dialog box is open in the center of the screen. The dialog box has a title bar that says 'Security Warning' and a close button (X) in the top right corner. On the left side of the dialog box, there is a graphic showing a computer icon at the bottom, a vertical dotted line, and a document icon at the top. To the right of this graphic, the text reads: 'A file named P2PNetworkMonitor.exe was found on your computer. This file may be a security risk. Do you want to delete it?' Below this text, there are three buttons: 'Yes', 'No', and 'More Info'. At the bottom of the dialog box, there is a checkbox labeled 'Show this warning from P2PNetworkMonitor.exe' which is currently checked.
